

PILLAR-STD-M

ENGINEERED TO BE BETTER

MAINS POWER SENSOR TAP - DECK MOUNTED

The Australian designed and manufactured, **Autoflo Pillar-Std** Mains Power Sensor Tap is suitable for a wide range of applications ranging from public commercial areas such as recreation and shopping centres, to private commercial bathrooms, through to hospitals, health facilities, and any application where hygiene and water savings are a priority.

The robust construction is complemented with an array of features ensuring consistent performance. The ability to self-range to its environment, the hygienic self-flush performed every 24 hours for bacteria control, the capability for multiple tap installations from one power source are just some of what sets the **Autoflo Pillar-Std** Mains Power Sensor Tap apart from other similar models on the market.

FEATURES

- Operating range self-initialisation
- Accessories available for multiple tap installations from one power source
- Robust design suitable for public and private installations
- Battery backup available
- Auto Hygienic Self Flush every 24 hours
- Multiple water flow options available for different applications
- Optional remote control for adjustment from factory settings
